Arturo Ortiz

has successfully completed the online, non-credit Specialization

Introduction to Environmental Science

The Introduction to Environmental Science Specialization explores current environmental problems, considering physical, biological & chemical processes that are often the basis of those problems. This specialization builds the skills necessary to address the environmental issues we are facing today by examining scientific principles and the application of those principles to natural systems. This three-course series surveys some of the many environmental science topics at an introductory level, ultimately considering the sustainability of human activities on the planet.

Aly Friedla

Andrew J. Friedland,
Ph.D.
Professor of
Environmental Studies,
Emeritus
Richard and Jane Pearl
Professorship in
Environmental Studies,
Emeritus

The online specialization named in this certificate may draw on material from courses taught on-campus, but the included courses are not equivalent to on-campus courses. Participation in this online specialization does not constitute enrollment at this university. This certificate does not confer a University grade, course credit or degree, and it does not verify the identity of the learner.
